Brand New Book ***** Print on Demand *****.Excerpt from Chinese Education From the Western Viewpoint The following pages contain a general survey of the educational development of China up to the present time. This is, as far as the writer's knowledge goes, a pioneer work and, as such, contains probably many errors. He has tried, however, to be accurate throughout in the selection of material and the translation of original sources. The occidental students of educational history generally have a hazy and inadequate idea of what the term Chinese education really connotes. Some speak of the examination system, which forms but a link in the whole chain of the educational development of China, as though it constituted the whole history of Chinese education.
